

COPENHAGEN CAPACITY

Project Manager – Science Hub Denmark

The Science Hub Denmark initiative is expanding. Join us and help tell the world why Denmark is a fantastic place to pursue a career in research!

We are looking for an enthusiastic, science-driven project manager to join an energetic, growing team dedicated to branding and positioning Denmark as a top international career destination for elite and leading researchers in AI, Biosolutions, Biomedicine, Neuroscience, Sustainable Energy Tech and Quantum.

We are still searching for a new setup for the team and are therefore open to profiles within all our 6 focus areas.

Your tasks and responsibilities

- Developing and executing the various activities and events in the project.
- Setting up and executing both online and in-person events. Some international travel will be expected.
- Conduct market research.
- Lead in your specific research area.
- Candidate and university outreach.
- Work with our CRM system, HubSpot.

Your profile

You have completed a master's degree or PhD in either Biomedicine, Biosolutions, Neuroscience, Quantum Technologies, AI or Sustainable Energy Tech.

You are excited about the opportunity to share with the world why Denmark is a great place to live and do research. You are a motivated, driven, creative and structured team player.

It would be good if you have an interest in the interplay between research and project management and some of the skills and competencies listed below. But don't worry if you don't have them all. If you have the right mindset, everything is possible!

- A passion for science and an interest and firsthand knowledge of one of our research areas at Danish universities.
- Proficient in English both verbally and in writing.
- Skills in data interpretation, analysis and visualization/reporting, potentially with PowerBI experience.
- Good organizational and time management skills.
- Ability to work effectively within a team and independently.
- Comfortable making and delivering presentations, in Danish and international settings.

Copenhagen Capacity

Copenhagen Capacity is Greater Copenhagen's organization for investment promotion and regional economic development. We work to make the region even more attractive to foreign

COPENHAGEN CAPACITY

investment and market it internationally to attract companies, investors, and highly educated workers.

The goal is to create jobs, growth, and development in Greater Copenhagen. In addition to that, we are a close-knit, passionate organization with a multinational work environment where English is our shared office language. We value collaboration and connection, whether over lunch in the company canteen with colleagues across departments or at social events.

Science Hub Denmark

Science Hub Denmark is an initiative dedicated to enhancing the international visibility of Danish research and career opportunities in Denmark. With funding from Villum Fonden, Novo Nordisk Fonden, and Lundbeck Fonden, the initiative will continue for three more years with the aim of significantly increasing the interest in Danish research worldwide, while also exploring innovative strategies for promoting career opportunities in Denmark.

Emphasizing research excellence, societal impact, and quality of life, the initiative will utilize digital channels to engage researchers abroad and facilitate recruitment for research positions at Danish universities. The project focuses on key areas: Biosolutions, Biomedicine, Neuroscience, Sustainable Energy Tech, Quantum and AI; research strongholds where Denmark excels internationally.

How to apply

If you think you're the right profile for this position and our team, please apply before the 8th of November 2026 by sending your CV and cover letter to job@copcap.com with "Science Hub Project Manager" in the subject line.

First round of interviews is expected to be held in the week of 9-13 November.

If you have any questions regarding the role, please reach out to Head of Science Hub Denmark – Alexander Watts, by email: alw@copcap.com
